## PROFESSIONAL SUMMARY

Enthusiastic and reliable fresher pursuing a Diploma in Information Technology, seeking an entry-level opportunity in PHP and Web development. Skilled in HTML, CSS, Bootstrap, and WordPress with theme & plugin customization. Strong knowledge of Full PHP (Core + OOPs Concepts) and basic understanding of Laravel framework. Known for quick learning ability and strong communication skills.

## MY PROJECTS

### College Management System

PHP | MySQL | Bootstrap

- Developed a full-featured College Management System using Core PHP and OOP concepts.
- Features include: Student Registration, Attendance Tracking, Marks Entry, and Admin Dashboard.
- Designed responsive UI with Bootstrap for both desktop and mobile users.
- Used MySQL database for data storage with secure CRUD operations.
- Implemented login/logout system with role-based access (Admin / Student).

### Blog Page

HTML | CSS | PHP | WordPress

- Created a fully functional Blog Page using HTML, CSS, and PHP for backend logic.
- Features include: Post Creation, Category Filtering, Comment Section, and Search Functionality.
- Also built a WordPress-based blog with custom theme and plugin customizations.
- Implemented dynamic content rendering with PHP and MySQL database integration.
- Designed clean, responsive layout optimized for readability on all screen sizes.

## PRACTICAL EXPERIENCE

- Built multiple practice websites using HTML, CSS, and Bootstrap layouts.
- Created WordPress websites with theme and plugin customization.
- Practiced responsive layouts optimized for both mobile and desktop devices.
- Worked on Full PHP projects using Core and OOP concepts.
- Explored basic Laravel framework through hands-on project practice.
- Configured themes and plugins for WordPress-based websites.
